Previous learning

- Responsibility to others when sharing
- Sources of support
- SMART rules
- Sharing passwords

Aspirations

- Web designer
- Computer programmer
- Emailing for business

Characteristics needed for this topic:

- Confidence/self-belief
- Reasoning and problem solving
- Perseverance

Key Vocabulary

Digital footprint – The information about a person that exists on the Internet as a result of their online activity.

Password - A string of characters that allow access to a computer system or service.

PEGI rating – A rating that shows what age a game is suitable for.

Phishing – The practice of sending email pretending to be from reputable companies in order to persuade individuals to reveal personal information, such as passwords and credit cards numbers

Screen time - Time spent using a device such as a computer, television, or games console.

Spoof website – A website that uses dishonest design to trick users into thinking that it represents the truth.

Sticky knowledge

Although the Internet is a brilliant resource for learning and entertainment some people use the Internet to cause you harm. Being aware of these dangers can help keep you safe and protect your privacy.

The term digital footprint is used to describe the traces that people leave behind when they have visited a website or used social media. Your digital footprint is unique to you.

Using a screen can help you surf the Internet or enjoy computer games but you need to be careful how much time you spend using a screen. For instance, using a screen at night can damage your sleep patterns. Turn your screen off regularly and enjoy the world outside.
